

CV – Pierre Verstraete

Dr. Pierre Verstraete is a senior scientist at Procter and Gamble Services Company N.V with a PhD. in Chemistry and a Post-Doctoral Fellowship at P&G London (Marie-Curie FP5). For nearly seven years, he applied computational chemistry to improve a broad range of consumer products (Dish liquids, Fabric softeners, Hair Conditioners and Diapers). Now he develops controlled release technologies in the upstream Chemistry Transformative Platform Technology department. Co-supervised 3 Postdocs, 7 PhD students and 8 Master students.

Webinar – Online, September 7th 2022

Title: Encapsulation stories

Abstract:

In this webinar, Dr. P. Verstraete will focus on the history of encapsulation in consumer goods products up to recent developments in this area. The challenge of capsule development in consumer goods will be shared.
