

Reaxys Academic Edition

A chemical database designed by chemists

Reaxys User Day @UniFI
March 15, h 9:30

Aula 16 Blocco Aule, Polo Scientifico e Tecnologico di Sesto Fiorentino
Viale delle Idee, 23, 50019 Sesto Fiorentino FI

Teach and Learn

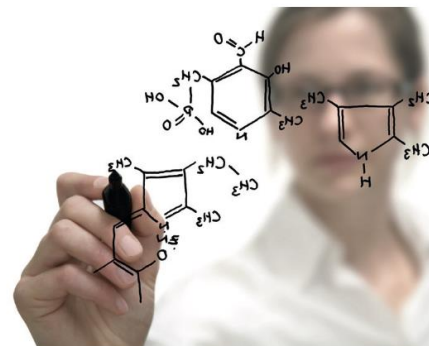

Design experiments

Access publications

Chemists in every field search for chemistry literature and bioactivity data, so why not learning how to query and filter for chemical substances and reactions with our database? You will be empowered to more consciously design your reaction based on the most recent literature, study your target compounds, investigate recent patents and carefully plan the budget needed for your experiments. Additionally, you will learn how to organize your research and collaborate with others online by using Mendeley, Elsevier's free reference manager and academic social network.

Designed by chemists,
Reaxys is more than chemistry database,
it's a cheminformatics solution
that delivers chemistry facts the way chemists need them.
